PROPERTY IS IN NAPA COUNTY

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

MAILED APRIL 27, 2005

Mr. William J. Imboden
730 Glacier Way
Fairfield, CA 94534

Dear Mr. Graves:

**SUPPLEMENTAL STATEMENT OF DIVERSION AND USE, STATEMENT NOS. S002577
AND S002842 FOR DIVERSION FROM THE EAST BRANCH SUISUN CREEK,
NAPA COUNTY**

The State Water Resources Control Board, Division of Water Rights (Division), received your letter dated March 19, 2005. You state in your letter that you have sold 3.3 acres of your property to your son, William T. Imboden. During our April 22, 2005 telephone conversation, we discussed that you should retain Statement Nos. S002577 and S002842 solely in your name as those diversions serve property you still own. Your son, William Imboden, should file a separate Statement of Water Diversion and Use for the riparian diversion to his property. Each point of diversion requires a separate Statement of Water Diversion and Use.

I have enclosed a Statement of Water Diversion and Use packet, as you requested. Should you or William on have any questions relative to completing the form, please call me at (916) 341-5315.

Sincerely,

attention Mr. Rick Satkowski

Mr. Satkowski - I need some guidance
relative to updating my supplemental statements
of water use. I contacted Pat Meroney and she
advised me to prepare a detailed explanatory paper
and submit it to you. Enclosed is, hopefully, such
a paper. Please advise me as to how to do what
is outlined there. She also indicated I should
get a "verification" - I don't know what that means.

Sincerely,

William J. Imboden

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and per 1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.
